We offer the only sunglasses with lenses developed by a Doctor of Optometry specifically for tennis which also feature:

- \* lenses that mute all colours except for optic yellow (the ball) and white (the court lines); you see both much more clearly.
- \* lenses that have a darker gradient along the top to minimise "sun blindness" when serving and hitting overheads.
- \* frames that have adjustable nose pads so you can position the lenses at the most comfortable distance from your eyes.
- \* frames that are unisex and fit players of all ages from 10+.
- \* temperature controlled grips on nose pads and temples for stability.
- \* a choice of models and frame colour combinations.
- \* lenses that are 100% UV protective.
